SUMMARY

Skilled and Self-taught Developer with a strong background in web application development. Skilled in JavaScript, HTML, CSS, React.js and Node.js MongoDB. Committed to creating and deploying innovative and scalable web and mobile solutions.

PROJECTS

Code Quest

- A MERN stack-based competition website designed to facilitate teacher-student interactions. The platform provides features such as live feedback, progress tracking, and real-time communication to enhance the learning experience. Fully deployed and optimized for performance, the project incorporates secure authentication, user management, and dynamic content updates. This project showcases my ability to develop scalable web applications with an intuitive user interface.

Tax Expert

- Developed a professional portfolio website for Deepak Shrivastava, a lawyer, to showcase his legal services and expertise. The website is built with a focus on clear navigation, modern design, and responsive features to create a polished online presence. The project involved custom design, front-end and back-end development, and integration of essential client information and case highlights, ensuring a seamless user experience across devices.
